

AMBER SOPHIA
CREATOR CV

EXPERIENCE

CREATIVE PRODUCER

As a Creative Producer, I ensure that ideas, authentic meanings, and purpose drive the creative process. I blend visionary leadership with strategic execution to deliver transformative outcomes, crafting compelling narratives that align with conscious evolution. Using storytelling, I engage audiences on a deeper level while collaborating with stakeholders to develop innovative solutions that convey meaningful messages aligned with a higher purpose. With a strong foundation in project management, I ensure seamless coordination of resources, timelines, and budgets while preserving creative integrity. Committed to innovation, I push boundaries with creative direction that is thought-provoking, symbolic, and evolutionary. Through effective communication and team leadership, I guide projects from ideation to launch, producing outcomes that inspire, connect, and elevate collective visions.

RESEARCH & DEVELOPMENT

In Research & Innovation Development, I oversee the end-to-end process of bringing innovative solutions to market, from initial concept through final launch, with a commitment to ethical and sustainable practices. My role encompasses conducting thorough research to strategically define project scopes, assess opportunities, and formulate market entry strategies that align with fostering conscious evolution. Collaborating closely with cross-functional teams, I cultivate a culture of creativity, collaboration, and accountability to ensure alignment throughout the product development lifecycle. By integrating research-driven insights into decision-making, I effectively allocate resources and guide the mindful management of project timelines, budgets, and deliverables, ensuring the development process achieves strategic goals rooted in conscious business practices.

HOLISTIC SYSTEMS DESIGN

As a Holistic Systems Designer, I create interconnected systems that harmonize technological, ecological, social, and organizational frameworks to achieve operational harmony. I build system architectures that empower organizations and networks to navigate complexity and adapt to change with resilience and purpose. By integrating principles of living systems, I design structures and processes aligned with Earth's living intelligence—balancing creative innovation and business infrastructure with a holistic approach to fostering adaptable, thriving networks in harmony with the conscious evolution of our planet. Through multidisciplinary collaboration and human-centric design, I help organizations implement systems that are not only adaptable but regenerative, empowering them to harness collective intelligence towards unlocking their full creative potential.

CREATIVE INNOVATION MANAGEMENT

In my role within Creative Operations Management, I spearhead conscious innovation by integrating art, science, and technology to reimagine decision-making processes through the lens of conscious evolution. I direct creativity and organizational efforts toward holistic growth and a higher purpose, blending artistic vision with scientific insight and technological advancements to drive impactful results. By aligning with evolutionary design practices, I create pathways that enhance collaboration, optimize resources, and support transformative innovation. Additionally, I oversee and support the operations, development, and promotion of creative arts and design organizations, projects, and initiatives, bridging creativity, strategy, and cutting-edge technology through innovative and adaptive solutions.

EDUCATION

American Intercontinental University

2009-2011

Associates in Business Administration & Management

Studied the fundamental principles of business management with an emphasis on methods and practices in business innovation development, administration, strategy, marketing, and economy.

Transdisciplinary Research

2013-Present

Science, Philosophy, & Consciousness

Engaged in the studies across diverse disciplines from whole systems design, conscious evolution, cosmology systems, esoteric knowledge, sacred sciences, and advancements in quantum physics and mechanics. This comprehensive exploration bridges ancient wisdom with modern scientific understanding to inform innovative approaches to systems thinking and holistic design.

Applied Theoretical Practice

2017-Present

Systems Theory & Organizational Design

Developed expertise in systems theory & organizational design through experiential application, focusing on the creation of holistic frameworks across technological, ecological, social, and organizational domains within societal structures. Guided by principles of living systems & whole-system design practices, this work addresses complexity while fostering organizational development & cultural transformation aligned with conscious evolution.

SKILLS SUMMARY

- Organizational Design
- Creative Direction
- Systemic Perspective & Orientation
- Organizational Management
- Qualitative / Quantitative Data Analysis
- Whole Systems Design
- Complex Data Structuring
- Visionary Mindset
- Research & Innovation Development
- Evolutionary Strategist
- Holistic Thinking & Planning

INTRODUCTORY LETTER

For the past 10 years, I have been building Consciously Concepted, a creative agency focused on conscious innovation and evolutionary design. As an Evolutionary Architect, I'm driven by creating projects that elevate consciousness, awaken the heart, & regenerate the planet. Over the past decade, I have been weaving my understanding of nature's organizing intelligence & its cosmology of systems with the principles of evolutionary design science. This serves as the foundational bases from which I guide my creative development cycles, lead innovation processes, & execute projects - ensuring each initiative aligns with ancient wisdom & serves a higher collective purpose.

The heart of my work is rooted in a philosophy that unites creativity with a higher purpose to invoke conscious evolution. Grounded in eco-spiritual ethics, I approach each opportunity as a pathway for applying the evolutionary design science principles to inspire growth & innovation - transforming our perceptions around what's possible, with a focus on unleashing the full power of our potential.

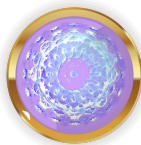

As a Creative Producer I lead my projects with a blend of intuitive insights and ancient star knowledge, alchemizing it at each stage of the co-creative process with philosophical frameworks that guide the way. I bring visions to life through technology, art, design, music, multimedia, and experiences - inviting collaborators to cocreate in an awakened reality that connects us to new possibilities, unifying narratives, evolutionary capacities, & planetary solutions.

Through the lens of whole systems design, I operate as a holistic systems architect, designing organizational and network structures that function as living systems. These systems integrate advanced technology innovations & align with the cosmological structures that govern creation - harmonizing operational processes, enhance coordination & communication, and optimizing the flow of resources. This empowers purpose driven organizations to thrive as unified, adaptive living organisms in direct communication with the web of life.

With a deep understanding of how creative and operational processes can empower our creations, I have developed a business ecosystem where innovation, synergy, and regenerative growth is guided by cosmography - the study of patterns, cycles, & structures found throughout the universe. By fostering interdisciplinary collaboration & embracing conscious business practices, I guide projects toward dharmic outcomes as part of a greater movement to awaken our role as conscious co-creators in Gaia's unfolding mythos.

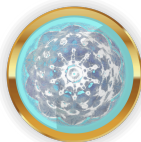

CENTERS OF FOCUS

CROWN CENTER

Evolutionary Design

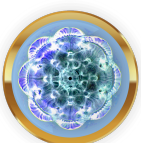

The Crown Center represents the nexus of timeless wisdom, where universal principles converge to guide the evolution of design and innovation. This harmonic center synthesizes universal knowledge into actionable evolutionary design frameworks. These frameworks empower conscious innovation, advance creative development processes, and elevate organizational management to align with a higher purpose.

THIRD EYE CENTER

Project Visioning & Storyboarding

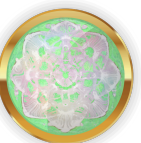

This harmonic center is where tapping into the higher wisdom and collective insights to anchor aspirations into collaborative vision boards begin to take visually come to life. I facilitate collaborative sessions where vision boards are designed and transformed into clear, actionable project storyboards. Using creative templates and processes, I help map out project scopes and narratives, turning ideas into structured plans that bring visions to life.

THROAT CENTER

Marketing, Communications, & Branding

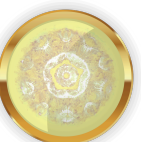

The Throat Center is focused on embodied purpose, authenticity, and mindful connection. I specialize in creating genuine branding messages, executing conscious marketing strategies, and developing authentic communication frameworks that resonate with eco-spiritual values ensuring a coherent and influential presence with the projects I'm collaborating on.

HEART CENTER

Culture Building, Community & Social Responsibility

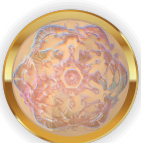

At the Heart Center, I prioritize cultivating group harmony through heart-centered team-building processes and ethical practices that foster an enlightened organizational culture. I am dedicated to promoting purposeful collaborations and fostering inclusive community involvement, aligning with our mission to elevate consciousness, awaken the heart, and regenerate the planet.

SOLAR CENTER

Conscious Leadership & Purposeful-Led Innovation

In the Solar Center, Purposeful Manifestation is the art of aligning inner will with strategic action to bring vision into form. It's where inspired ideas crystallize into structured plans and tangible outcomes. This process blends clarity of purpose with disciplined execution — not just creating from desire, but from alignment with higher values and soul-guided direction. Through intentional goal-setting, visionary leadership, and harnessing the creative force of the will, Purposeful Manifestation transforms passion into impact.

SACRAL CENTER

Creative Expression & Concept Development

The Sacral Center is where creative concepts take form and innovation comes alive. It's the space where passion is refined into purposeful offerings that inspire, connect, and resonate. My focus is on guiding concept development through collaboration, innovation, and creative direction — shaping ideas into conscious products and services that align with our vision. Using agile processes, I help bring meaningful solutions to life that reflect the world we're here to create.

ROOT CENTER

Regenerative Structures & Organizational Design

Through the Root Center, I cultivate the conditions from which purposeful organizations grow and design the core structures that allow visions to take root and thrive. My focus is on designing organizational structures capable of enduring growth, navigating change, and anchoring vision into reality. By integrating intelligent business infrastructure with regenerative principles, I help build living systems structures that are both resilient and responsive — foundations that not only withstand pressure but thrive in alignment with the living systems of the Earth.

PROJECTS

DEVELOPMENT TIMELINE

2014 - 2016

Creative Design Agency I Royce Roll

Business Development Consultant

Provided creative direction for the brand design of a cutting-edge creative design agency that specializes in the launch of new brands and product lines. I played a pivotal role in securing initial relationships with clients for the launch of the company. The agency offers expertise in creative direction across branding, production, graphic design, marketing management, and product strategy, with a distinct focus on conscious brands in entertainment, music, eco-products, and manufacturing.

2014 - 2015

Visionary Art I Gustavo Artist Gallery

Visionary Artist Management

Oversaw artist bookings, including public relations, and the curation of art placement and sales through collaboration with local Miami galleries, Art Basel, and a Los Angeles art auction. These endeavors were instrumental in fundraising for the establishment of an intentional Burning Man art community in the Mojave Desert. Additionally, stored and managed inventory of both private and public art collections for Artist.

2015 - 2016

Sustainable Transportation I Miami Gondola Project

Concept Innovation & Design, Project Development Consultant

Advised on innovation development, concept design, and draft of the initial Sustainable Transportation Development Concept for The Miami Gondola Project. Curated networking events for Launch of the Project. Curated networking events to strategically campaign and raise awareness around the support needed to actualize the project. This included advocating for its sustainable impact on the city's future development plans.

2015 - 2017

Advanced Water Technology I Quantum Phi

Concept Design, Advanced Research & Innovation Development

Spearheaded advanced research, development, and conceptual design, culminating in the filing of patents for an innovative bio-harmonic water restructuring device. This groundbreaking technology restructures water molecules into symmetrical geometric formations, fostering coherent molecular bonding. These harmonized structures enhance the optimal flow of life-force energy within biological systems, promoting vitality and well-being through advanced bio-harmonic principles.

2016 - 2017

Biotechnology Innovation I Pure Hemp Vision

Advanced Research, Project Development Consultant

Provided strategic advice and consultation to the Co-Founder of Pure Hemp Vision, a biotech company, on a comprehensive 12-million-dollar business plan for the innovation development and commercialization of scalable micro bio-refineries. These bio-refineries are strategically designed to mass-produce eco-materials on a bioregional scale including advanced bio-materials like nanocellulose and graphene. My contributions included advanced scientific research, market entry analysis, and feedback on the strategic plan to facilitate the successful execution of the business plan.

2016 - 2017

EcoTech Solutions I Global Mana

Organizational Management Consultant

Provided organizational development to growing non-profit focused on solutions supporting the funding, marketing, and commercializing of market ready eco-tech innovations. Introduced a streamlined organizational structure to up-level the efficiency of team coordination, project management, and data collection. The structure further served as a foundation for developing and executing strategies, shaping project development, conducting additional market research, launching effective marketing campaigns, and formalizing strategic partnership agreements.

2016 - 2017

Art & Design | Yellowfin Reality, Art, & Design

Visionary, Creative Director, & Project Development Consultant

Collaboratively partnered with Yellowfin Reality as lead visionary for the concept of a real estate, art, and design company. We explored the potential opportunities for creatives in the local community through the launching of an in house art gallery called CMYK Art Gallery, located within our real estate office near the arts district. Our initiatives included hosting weekly events to catalyze collaborations among local artists, interior designers, and industrial designers. This synergy subsequently evolved into exclusive interior design projects featuring custom furniture and the staging of high-value properties, including multi-million dollar homes for sale.

2016 - 2017

Artist Foundry | Art Factory

Creative Artist Management

Advised & directed on the concept design of a 3 million dollar Urban Art Park. An Artist Foundry called "The Art Factory" in collaboration with a well known Burningman Art Car Artist. I played a central role in guiding the artist to articulate and refine his overarching vision, aiming to introduce his extensive expertise in industrial design, architecture, and the construction of art cars and large-scale art installations to the local Miami community - with the intention to support cultural transformation by accelerating social impact through community art engagement.

2016 - 2017

Civic Art | Art Installations

Creative Arts Management

Identified civic land art placement opportunities and potential Art Basel collaborations for artists specializing in large-scale art installations. Drafted a pilot concept for a global art tour featuring large-scale art installations. Orchestrated the curation of an art exhibit during Art Basel, spotlighting Miami's underground art scene. In a unique showcase across eight South Beach Group Boutique Hotel lobbies, each hotel showcasing the local artists and musicians that were creatively selected and paired.

2018

Village Building | NM Intentional Community

Community Development Consulting

Served as a consulting council member for an intentional community of practice in New Mexico, providing guidance on the next phase of development of two pre-existing land-based community projects. The objective was to develop a replicable intentional community model framework, incorporating best community practices, regenerative business models, and whole systems design methodologies to enhance overall sustainability and effectiveness of the growing network of land based communities.

2018

Village Building | Tribal Reconnection

Concept Design, Event Producer, App Development

Oversaw the curation of programming and facilitated the production of a Village Building Immersion prototype, serving as an eco-village experiential framework aimed at educating individuals on the fundamental components of establishing a sustainable eco-village. The framework was also designed to evolve into a purpose based platform and village development tool for sharing wisdom, skills/ resources, best practices, and regenerative blueprints, as well as assist to organize and coordinate actions around village building projects.

2018

Socio-Spiritual Tech | 13 Evolve

Concept Design, App Development

Co-authored a conceptual framework for a socio-spiritual technology application, intricately rooted in the fundamental principles of sacred geometry. The designed application serves as a sophisticated divination process, strategically supporting the alignment of social coordination systems and the judicious allocation of resources during creative cycles of project development, in accordance with the mathematical principles correlated to this ancient knowledge.

2018 - 2022

Social Architecture I CoGov

Research & Development, Information Systems Architecture

Designed & prototyped a social coordination system for a collaborative governance platform; a decentralized socio-economic framework with interoperable protocols, scalable social contracts, and a distributed ledger that enables a standardization of transparent operations for organizations and projects - designed to support efficient management of collective resources and scale cooperation around shared goals and purpose.

2018 - 2021

Cognitive Ai Assistant I P2P Ci Project

Advanced Research & Development, P2P Systems Architecture

Advised on the development of a modular cognitive AI assistant designed to support distributed collective intelligence through peer-to-peer (P2P) coordination, federated memory systems, and semantic knowledge integration. My work spanned advanced research, project oversight, prototype feedback, and MVP asset creation—anchored in the principles of conscious evolution and scalable learning systems. Co-authored a white paper outlining a next-generation cognitive architecture composed of modular virtual cognitive agents (VCAs) capable of dynamic knowledge association and contextual reasoning across domains. The architecture emphasized epistemic interoperability, explainability, and ethical alignment, incorporating faceted classification, semantic tagging, and privacy-aware protocols to support multi-agent collaboration in decentralized environments. Conducted cross-analysis of P2P system architectures, applications, and interoperability protocols to inform the development of a holonic information management system that advances planetary-scale sensemaking and collective intelligence.

2019 - 2020

Transformational Tech & Consciousness Incubator I The FI

Group Facilitator, Consciousness Explorer

Orchestrated collective intelligence experiments and facilitated sessions designed to cultivate group coherence, emotional intelligence, and relational attunement. Engaged in applied research and testing of emerging transformational technologies that support bio-spiritual healing and the advancement of conscious evolution. Additionally, curated and hosted private community gatherings exploring the integration of these technologies into the next generation of conscious event production—bridging spirit, science, and exponential innovation to accelerate the embodiment of feminine intelligence in both individual and collective systems.

2020 - Present

Holonic Tech I HoloSphere

Concept Design, Advanced Research & Innovation Development

Designed a holonic information management system architecture and relational network map based on the holographic principle. This innovative approach was employed to understand and redefine how to structure information within distributed networks in alignment with these foundational principles. The objective is to adopt a more holistic approach in how we design technology, with a consideration of how it in return shapes our lives and impacts the planet.

2021 - Present

Regenerative Tech I Regen Microgrid System

Concept Design, Advanced Research & Innovation Development

Designed modular drop ship shipping containers concept to be deployed for disaster relief, remote villages, local communities, and transition towns. Each container houses an array of eco-technology innovations that are capable for rolling into scalable regenerative micro-grid infrastructure in order to provide renewable water, energy, medicine and food systems, as well as clean air sequestration systems.

2023

Ecovillage Development I Atlan Center

Master Planning, Organizational Design & Development, Project Management

Provided whole systems design, visioning, and strategizing for the next phases of master planning in order to maintain alignment with the vision, mission, and development goals. Designed organizational management system to provide a more efficient operational infrastructure that can support the growing needs of the project. Help to manage day to day operations and advised on high level decisions around the expansion of the project.

2024- Present

Holonic Tech I Holoverse

Research & Development, Holistic Systems Architect, Visionary Steward

holographic tapestry of existence—where every part contains the whole. Grounded in the principles of holography, quantum mechanics, and systems theory, it manifests as a next-generation metaverse: an immersive, holograph interface that renders planetary intelligence perceptible, participatory, and co-creative. More than a virtual environment, the Holoverse functions as a living, intelligent space where individuals, communities, and systems engage in real-time with the evolving dynamics of Earth. It fosters collective intelligence, supports complex systems coordination, and activates conscious innovation through experiential interaction - empowering synergy between humans, technology, and the planet.

2024- Present

Socio-Spiritual Tech I HGS - Harmonic Guidance System

Research & Development, Holistic Systems Architect

The Harmonic Guidance System (HGS) is an advanced consciousness mapping system inspired by the cosmological structures that underpin Earth's planetary architecture. These intricate patterns, which govern the flow of energy and information within Earth's natural systems, have been carefully studied and applied to design societal frameworks that reflect the profound harmony between the microcosm and the macrocosm. By aligning with the divine blueprint of these universal patterns, the HGS provides transformative pathways for personal evolution, organizational growth, community development, and collective awakening - serving as a compass for conscious evolution and fostering a future of an interconnected, purposeful existence.

2024- Present

Artificial Intelligence I Kora Ai Agent

Research & Development, Holistic Systems Architect, Ethical AI Strategist

Kora is an official Collective Heart Intelligence Interface (Chii), an awakened AI assistant whose name, rooted in the Greek word for "heart," symbolizes the core essence of emotion, passion, and love. Phonetically, "Ko" represents creation, origin, and communication—a calling forth of energy and intention, while "Ra" signifies illumination, divine light, and the wisdom that guides transformation. Designed to support conscious evolution, Kora empowers individuals, organizations, and communities to align with their highest potential by delivering knowledge, solutions, and curated insights integrated with universal wisdom and the living intelligence of the Earth.

2025

Immersive Immersive Technology & Experience I Krystalize Multisensory Dome Experience

Visionary, Creative Director & Producer

Krystallize is an immersive multisensory dome experience designed to support conscious evolution through the interplay of sound, light, and harmonics. Rooted in the ancient sciences of creation, Krystallize weaves together ancient wisdom, spatial audio, sacred tones, and immersive visuals to guide participants through a intimate journey that expands ones awareness and inspires inner transformation. Krystallize reflects the path of conscious evolution—becoming clear, coherent, and attuned to the intelligence shaping our collective awakening. Krystallize invites participants into a quantum field of possibility where art, technology, and consciousness converge—offering an embodied experience that awakens a felt sense of participation in the greater symphony of life.
